

# rally stopwatch-tripmaster CR100

The perfect companion for rally co-driver. The necessary and sufficient features are grouped in this intelligent and ergonomic product.

It allows the crew to manage its lead or delay at any time of the rally. The **stopwatch automatically takes intermediate times**, and then **displays the gap with the same stage** of the preceding lap. In case of lead, it switches on one or two green LEDs. In case of a delay, it switches on one or two red LEDs.

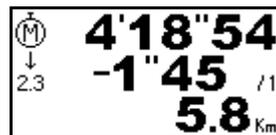

## Functions:

**Data display** on **backlit** graphic display with excellent contrast even in **sunny conditions**.

The data to be displayed are **spread over 3 pages** so the co-driver can concentrate on the essentials.

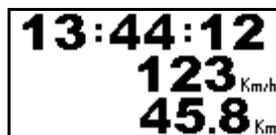

### During stages:

- elapsed time,
- time gap,
- tripmaster.

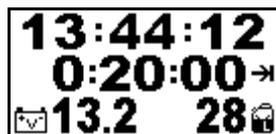

### During liaison sections:

- time,
- vehicle speed,
- tripmaster.

### During service:

- time,
- countdown,
- fuel gauge,
- battery voltage.

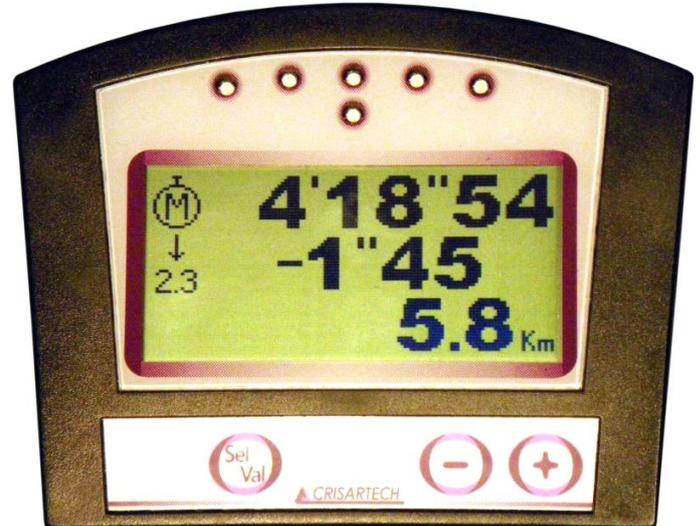

Stopwatch can start with:

- a button or a pedal,
- vehicle start.

Stopwatch stop with a button or a pedal.

With the remote keypad, essential functions are always within reach.

## A CRISARTECH product gives you:

- an attractive performance / price ratio,
- an excellent readability whatever the ambient light,
- **intuitive ergonomics**: pictograms use, configuration menus in 3 languages (F, GB, SP),
- a clock with a battery that recharges in a few minutes when in use,
- **the possible customisation of all functions**: trip number, displays, wiring harness, fastening, front panel keypad. Auxiliary functions can be added (average speed calculation, relay control, injection diagnostic, ...). Contact us.

## Technical data:

- alimentation: 8 to 16 Volts, about 0.1 A.
- screen: real graphic display 75 x 36 mm,
- case: polycarbonate, 123 x 98 x 32 mm, 200 g.
