

rally-raid tripmaster-stopwatch TR100

The perfect companion for rally-raid co-driver. The necessary and sufficient features are grouped in this intelligent and ergonomic product.

Functions:

Data display on **backlit** graphic display with excellent contrast even in **sunny conditions**.

The data to be displayed are **spread over 2 pages** so the co-driver can concentrate on the essentials.

During stages:

- elapsed time (hour:minute:second),
- vehicle speed,
- tripmaster 1.

During liaison sections:

- time,
- fuel gauge,
- battery voltage.
- tripmaster 2.

Stopwatch can start with:

- a button or a pedal,
- vehicle start.

Stopwatch stops with a button or a pedal.

With the remote keypad, essential functions are always within reach.

This basic version is designed to be customised (by adding additional pages) to allow the co-driver to manage a complete vehicle diagnostic:

- displays: pressures, temperatures...
- connections: independent sensors or CAN bus to Electronic Control Unit.

A CRISARTECH product gives you:

- an attractive performance / price ratio,
- an excellent readability whatever the ambient light,
- **intuitive ergonomics:** pictograms use, configuration menus in 3 languages (F, GB, SP),
- a clock with a battery that recharges in a few minutes when in use,
- **the possible customisation of all functions:** trip number, displays, wiring harness, fastening, front panel keypad. Auxiliary functions can be added (average speed calculation, relay control, injection diagnostic, ...). Contact us.

Technical data:

- alimentation: 8 to 16 Volts, about 0.1 A.
- screen: real graphic display 75 x 36 mm,
- case: polycarbonate, 123 x 98 x 32 mm, 200 g.
